

Position:

Associate Developer

Description:

Reporting to the Director of Development, as an Associate Developer, you will be responsible for advancing pipeline renewable energy projects (primarily battery storage projects, but also renewable power) from inception through commercial operation. You will be involved with all aspects of project development, such as real estate negotiation, management of interconnections with balancing authorities, permitting requirements, preliminary engineering requirements, sequencing and linking of construction events, etc. Projects will be located in multiple different states and periodic travel will be expected. A successful candidate will demonstrate a desire to grow their renewable energy knowledge, dig deep into the nuances of project development and regularly engage with subject matter experts outside of the development team. All members of the development team need to be results-oriented, have an excellent ability to work with others and a desire to solve complex problems.

Essential Responsibilities:**Project Management and Development:**

- Champion the creation of projects through presenting them to the Greenfield Committee.
- Work with the Real Estate Team to execute real estate agreements to secure project site control.
- Integrate with the Transmission Team to submit and manage project interconnections with balancing authorities.
- Advance the project through environmental and local permitting with the support of the Environmental and Permitting Team.
- Coordinate with the Engineering, Procurement and Construction Team to secure long lead items for project competition, evaluate project design and finalize project layouts.
- Provide and validate inputs for the Finance Team to enable effective project valuations.
- Contribute to continuous process improvement.

Power Marketing & Support for Structured Offtake:

- Work closely with the Market Analytics and Origination Team to evaluate market opportunities and provide pricing guidance based on customer goals and priorities in alignment with project model underwriting assumptions.
- Assist in executing and negotiating long-term structured transactions with wholesale and commercial offtake to support the financing and build-out of new renewable energy and storage projects.
- Establish and maintain relationships with existing and new customers in the IOU, Muni, Co-op, competitive retail supplier, and commodity / financial trading market segments.

Assist in overseeing the internal support teams through all aspects of the complex sales process to closing:

- Evaluate Requests for Proposals (RFPs) and provide project level inputs to bid preparation process.
- Support the Origination Team in conducting research into customers' businesses and energy procurement activities, including stated goals, targets, or Integrated Resource Plan (IRP) obligations, and develop initial ideas for Peregrine offerings.

PEREGRINE ENERGY

Required Skills/Experience

At least 1-2 years of experience renewable energy or project management. The ability to manage multiple internal and external stakeholders to advance projects and build consensus is essential.

Bachelor's in Engineering, Management, Finance or a similar field recommended.

Succeeding in this role will require:

- Self-motivation and a strong work ethic to win within a highly entrepreneurial, high-growth organization
- Strong attention to detail while still being able to multitask
- Outstanding communication and team management skills, high attention to detail, and organized in approach with sound judgement
- Ability to make decisions given incomplete information and rapidly learn and use new skillsets
- Willingness to travel within the US and Canada (30%)

Salary: Salary Range is \$100k - \$110k

Bonus: This position may be eligible to receive an annual cash incentive bonus capped at a % of your base salary and on your performance review.

Benefits: Current benefits include healthcare, dental and vision plans, 401(k)- retirement plan, group life and disability insurance.

Location: Boulder, CO
